ONAPGO®

(apomorphine hydrochloride) injection, for subcutaneous use

Ordering Details

Onapgo is only available to VA as a prescription dispensed by CVS Specialty Pharmacy.

The prescriber should complete the Onapgo Prescription Form for VA Patients and forward the form to the VA pharmacy for review. Once reviewed, the pharmacy should fax the document to CVS Specialty at (844) 691-1345 and to Supernus Patient Services at (502) 212-1097. This is the only version that should be used as the release of patient information is limited, and the operational details are specific to VA.

At the start of therapy, the patient will need the Onapgo Infusion Device Kit as well as the Onapgo medication and ancillary supplies. CVS Specialty dispenses and ships the medication and supplies, while Supernus ships the Infusion Device Kit. The cost of the medication is not inclusive of the ancillary supplies. The PO for the medication and ancillary supplies is issued to CVS Health. If the purchase order number is not populated, CVS Specialty will email the purchasing contacts and request the PO number and indicate the price to be charged for the medication and its ancillary supplies.

The medication is administered via the Onapgo Infusion Device. The Infusion Device Kit comes from Supernus Patient Services. The Infusion Device Kit is provided at no cost from Supernus Patient Services. Please contact soehler@supernus.com if there are additional questions.

The Onapgo Infusion Device Kit is not commercially sold and is only available to all customers at no cost. VHA Pharmacy Services received guidance that the acceptance of the Onapgo Infusion Device Kit at no charge does not require a national or local waiver. Based on the review of the dispensing program and medication administration, the Infusion Device Kit is not considered a gift. VA pharmacies may route prescriptions to the specialty pharmacy to ensure continuity of care for affected Veterans as this model falls within VA's ordinary provision of healthcare services.

Infusion Device Kit

First Prescription

CVS Specialty Pharmacy will call the VA pharmacy contact for the credit card information if selected as the payment method on the prescription form.

The medication and ancillary supplies will be shipped directly to the patient, or the VA pharmacy for relay to the patient, as indicated on the prescription form. CVS Specialty Pharmacy will notify Supernus Patient Services when fulfilling the first Onapgo prescription for a VA patient. The Onapgo Infusion Device Kit will then ship directly to the patient, or to the VA pharmacy for relay to the patient, as indicated on the prescription form.

The cost of the medication is not inclusive of the ancillary supplies. The supplies listed below are standard for a 30-day prescription dispensed by CVS Specialty:

- Thirty (30) Onapgo cartridge holders
- Two (2) gallon sharps containers at the start of therapy & as needed
- Infusion Sets, four (4) boxes at the start, three (3) boxes thereafter
- Two hundred (200) alcohol swabs at the start & as needed

CVS Specialty will call the VA pharmacy primary clinical contact 3-4 business days before the patient is to receive the prescription if there could be a delay in shipping the medication. The secondary clinical contact should be contacted if the VA primary clinical contact cannot be reached.

CVS Specialty will then fax a delivery confirmation summary (including the Veteran's name, name of the medication, NDC, quantity, date shipped, date received, confirmation/tracking number, and PO number) to the VA pharmacy within three business days for prescriptions sent directly to the patient.

CVS Specialty will fax or email a copy of the invoice to the VA pharmacy contact.

The company will also submit an e-invoice through the Tungsten Network for transactions not paid for with a credit card.

Supernus offers the optional Circle of Care Program that provides complimentary Clinical Nurse Navigator support. The Nurse Navigator will provide training on the Onapgo device and education. Ongoing support will be provided through dose titration and the entire time the patient is on Onapgo. If the patient elects to use the Circle of Care Program, the Circle of Care Program Support form and a copy of the prescription form must be faxed to (502) 212-1097.

Subsequent Refills and Prescriptions

Seven to ten days before the patient is scheduled to receive the next refill, the specialty pharmacy will email or call the VA pharmacy's primary purchasing contact for a dispensing and payment authorization, including a purchase order number for the Onapgo medication and ancillary supplies refill. If the primary purchasing contact cannot be reached, the secondary purchasing contact should be contacted. CVS Specialty will confirm the credit card information if selected as the payment method on the prescription form.

The purchase order number is required for payment to be authorized.

The specialty pharmacy will call the VA pharmacy primary clinical contact 3-4 business days before the patient is to receive the next refill if there may be a delay in shipping the medication. The secondary clinical contact should be contacted if the VA primary clinical contact cannot be reached.

The prescription will be shipped directly to the patient, or the VA pharmacy for relay to the patient, as indicated on the prescription form.

CVS Specialty will fax a delivery confirmation summary (including the Veteran's name, name of the medication, NDC, quantity, date shipped, date received, confirmation/tracking number, and PO number) to the VA pharmacy within three business days.

CVS Specialty will fax or email a copy of the invoice to the VA pharmacy contact.

The company will also submit an e-invoice through the Tungsten Network for transactions not paid for with a credit card.

CVS Specialty does not require an account application.

The pharmacy can be reached at 877-437-8469.
